

Dear Alan,

I'm wondering if you're aware of the following dire realities and their ramifications for the situation in which we all (helplessly) find ourselves.

While the entire world, not to mention Australia, is currently hobbled by ...Covid-19....., one clinically well-proven therapy that would have stopped the rot in its tracks, Ivermectin, as discovered by Melbourne's Monash university way back in April 2020, is being officially ignored and denied to us.....

The mainstream media are either ignorant of, or deliberately hiding the glaring conflict of interest between the US FDA's emergency use authorization of Covid-19 vaccines as **applicable only when "there are no adequate, approved, and available alternatives."** as stated plainly on the specification sheets for the Pfizer and Moderna vaccines....and the developed world's political/medical 'authorities' rejection and denial of the existence of the safe, cheap, clinically proven drug Ivermectin, which is "**adequate, approved, and available!**"

Again, from the UK Medicines and Healthcare Regulatory Agency's conditions for emergency approval of Pfizer/BioNTech, for example: "MHRA may review and adjust these conditions for temporary supply in response to any developments which it considers material, including any subsequent market authorisations that might be issued by other medicines regulators."

Those of us who have struggled to understand the blinkered, one-eyed political bias towards exclusive application of the 'vaccines solution' need look no further for an explanation.

The undeniable fact is that, notwithstanding the glut of available clinical evidence of Ivermectin's brilliant efficacy, the clearly compromised political/bureaucratic class doggedly cling, with their usual deflective media cover, to their puppet-like Big Pharma allegiance, knowing that any formal signs of political recognition and, God forbid, 'market authorisation' of the clinically proven prophylactic drug would put the hugely profitable mRNA vaccines under a cloudand this apparently must not happen....no matter the cost.

This isn't a 'theory,' rather it is documented proof of a worldwide conspiracy to ensure continued enrichment of the US Big Pharma complexto the massive detriment of the personal physical well-being of millions of innocent people here and around the world.

All political and bureaucratic 'public servants,' not to mention the media enablers who have engaged in the perpetration and proliferation of this heinous conspiracy, are nothing but inhumane degenerates who should be called before a Court of Human Rights to explain their counter intuitive anti-social behaviour.

Please review this short video by two very respected scientists about their considerations of this grave topic, as it fully supports my words above:

Thank you for hopefully taking this issue forward.....for the public's needy attention.....which I'm sure will bring justifiable outrage.....!!!
